

**American Safety and Health Institute (ASHI)**

**Frist Aid, Adult CPR, Child CPR, Infant CPR, and AED**

**Blended Training combines the convenience of online learning with a shortened practical skills sessions in order to meet both knowledge and skill objectives.**

**The online learning platform used for ASHI blended training classes is ASHI Learning. This specially designed web-based learning system allows for a variety of sensory interactions to provide users with a low-stress, easy-to-use, and convenient way to learn cognitive information.**

**It is important to note that students must successfully complete both the online and the skills portions of blended training. Completion of the online portion along will not result in certification.**

**Online portion takes approximately 2.5 hours and the skills can take anywhere between 40 minutes to an hour depending on the class size**
